Mobile Computers

General Duty Handheld Scanners

Patient safety and prevention of medical errors are among the healthcare industry's foremost concerns. Healthcare professionals rely on Datalogic bar code scanners during direct care activities in order to guarantee a correct patient identification, medication verification and a comprehensive Electronic Medical Records (EMR) management.

## EASEofCARE Service Programs

Datalogic's EASEofCARE Service Programs provide superior life-cycle support to ensure that products are always operating at peak performance. A variety of Service Programs are available to match your business requirements:

- EXTENDED RANGE OF COVERAGE (3 and 5-year options available)
- FASTEST REPAIR TURNAROUND TIME
- ENHANCED FREIGHT CONDITIONS
- FACTORY PARTS AND PROCEDURES
- SELECTED FACTORY UPGRADE
- BATTERY MANAGEMENT

Please contact your sales representative to find out what type of services are available in your region.

POS Checkout Retail pharmacies requires a careful optimization of the space on the counter to dedicate the best possible space to sellable items. For this reason, it is important that bar code scanning solution have small footprint and the most efficient scanning capability. Datalogic provide pharmacies with imaging technology able to scan small, hard to-read codes, even capable of reading 2D codes, today, the most common for prescription labeling.

## ABOUT DATALOGIC

Datalogic is a global leader in the automatic data capture and process automation markets, specialized in the design and production of bar code readers, mobile computers, sensors for detection, measurement and safety, RFID, vision and laser marking systems. Datalogic solutions help increase the efficiency and quality of processes in the Retail, Manufacturing, Transportation & Logistics and Healthcare industries, along the entire value chain.

Global industry leaders rely on Datalogic products, benefiting high customer service and innovative products offered for over 45 years.

Datalogic is headquartered in Bologna (Italy), employs approximately 2,700 staff worldwide, distributed in 30 countries, with manufacturing and repair facilities in the USA, Brazil, Italy, Slovakia, Hungary and Vietnam. In 2016 Datalogic had a turnover of 576.5 million Euro and invested over 50 million Euros in Research & Development, with a growing portfolio of over 1,200 patents in multiple jurisdictions.

Datalogic S.p.A. is listed in the STAR segment of the Italian Stock Exchange since 2001 as DAL.MI.

Industrial Handheld scanners

Unattended scanning systems

Machine Vision

Datalogic is next to Medical Device and Pharma Manufacturing and Distribution, verifying that life-saving products are manufactured to the exact specifications required, in order to properly dispense medications and to accurately track, label and inspect the devices. Thanks to its cutting-edge fixed imagers, scanners, handheld scanning and mobile computers, Datalogic ensures these items are properly traced throughout the whole supply chain, verifying: lot numbers, manufacturing information, expiration dates and more stored on 2D bar codes, at the device, carton, and pallet level.

Product and Company names and logos referenced may be either trademarks or registered trademarks of their respective companies. We reserve the right to make modifications and improvements.

# PHARMACEUTICAL

## PHARMA PRODUCTION

Pharmaceutical production requires high performance solutions for secure and accurate product tracking throughout every phase of the manufacturing process. Datalogic solutions include smart cameras, vision systems, laser marking systems, and fixed bar code readers that inspect, mark, and validate items as they move through production.

## PHARMA DISTRIBUTION

Medical device and pharma manufacturing and distribution brings life-saving products to hospitals, pharmacies, care givers, and patients for administration. Assuring these products are manufactured to exacting specification requires Datalogic vision and marking system that properly dispense, track, label, and inspect medications and devices.

# HOSPITALS

## LABORATORY

Ensuring the proper test is administered to the proper specimen, and the results are correctly reviewed and recorded is best accomplished using automatic data capture. Solutions employed in the laboratory help keep track of thousands of specimens efficiently and effectively while helping to combat infection. Datalogic handheld scanners and mobile computers are used by technicians and staff in the laboratory, and Datalogic bar code scanning engines are integrated into testing equipment. Together these solutions maximize the integrity of laboratory operations.

## SURGERY

Hospitals and medical environments require extreme accuracy in tracking disposable item expiration and non-disposable instrument cleaning. This information maximizes quality of care and reduces chances for infection. Datalogic technology delivers solutions for both applications. Surgical instruments are etched using Datalogic laser marking systems allowing them to have permanent bar codes unaffected by harsh chemicals and autoclaves.

These codes are read as part of the sterilization procedure. Datalogic scanners and mobile computers combine the latest data capture technology with Disinfectant-Ready enclosures designed to withstand daily cleaning with harsh chemicals to effectively fight germs and bacteria. These devices allow tracking of supplies and instruments from the sterile inventory to the operating room.

## ADMITTANCE

Electronic tracking of patients using bar codes increases the effectiveness of treatments and helps to eliminate errors. Bar codes are attached to medical charts and patient wristbands are used for identification from the admitting process through discharge. Datalogic handheld scanners and mobile computers deliver efficient and secure data capture eliminating manual data errors and patient file reliability, tracking and follow up.

## INVENTORY MANAGEMENT

Every enterprise keeps cost down through tight inventory management. In healthcare inventory controls are critical to ensure correct levels are maintained and expired items are removed. Datalogic solutions include mobile computers and bar code scanners that deliver a reliable and accurate inventory helping healthcare enterprises improve care and manage their costs.

## PATIENT, BED CARE

Bedside scanning and electronic medical records are in use throughout the healthcare industry enhancing the productivity and timeliness of medical staff while eliminating human error and poor decision making. Datalogic solutions for bar coding ensure patient safety by working with healthcare systems to enforce five key patient rights: Right Patient, Right Drug, Right Dose, Right Route, Right Time.

**5**  
PATIENT'S RIGHTS

RIGHT DRUG  
RIGHT PATIENT  
RIGHT DOSE  
RIGHT ROUTE  
RIGHT TIME

## IN-STORE OPERATION

Pharmacies rely on cost-saving inventory management systems using data collection equipment to track prescription medications. By scanning the prescription pick list during filling, pharmacies reliably and accurately track their activity ensuring proper inventory levels of their medications. Datalogic has an extensive offering of wireless and cabled handheld scanners for in-store operation.

## POINT OF SALE

Retail pharmacies are characterized by a small point-of-sale checkout locations having 1-3 checkout counters. With limited space, it is important that bar code scanning solutions have a small footprint. Datalogic presentation scanners and handheld scanners pack the latest technology into a compact form factor for efficient bar code reading in tight spaces.
